CoastCare How safe dunes v

Coast dunes are always changing as they build up in cycles. Dune plants play an important role in the natural cycles of dune erosion and recovery. They don't stop erosion, but can help it spend longer up recovery.

SETTLED WEATHER
Coast dunes are always changing as they build up in cycles. Dune plants play an important role in the natural cycles of dune erosion and recovery. They don't stop erosion, but can help it spend longer up recovery.

STORM EROSION
Storms erode the beach and dune, and can cause dunes to collapse.

BEACH RECOVERY AFTER STORM
CoastCare has been successful in helping the beach recover after a storm.

DUNE RECOVERY
Dune plants help sand, gradually rebuilding the dune.
